

CAPABILITY STATEMENT

Company Overview

Nuvasco Tech is a cloud solutions and cybersecurity services firm specializing in Microsoft Azure, Microsoft 365, and cloud security. We help organizations securely adopt, optimize, and protect Microsoft cloud environments while improving operational efficiency, scalability, and compliance. We deliver end-to-end cloud and security services—from strategy and architecture through implementation, security hardening, and ongoing management—using Microsoft best practices and a security-first, Zero Trust approach. Our solutions are designed to reduce risk, enable modern work, and support long-term business growth.

Service Delivery Model

Nuvasco Tech offers flexible engagement models to meet diverse organizational needs:

- Project-based cloud and security implementations
- Managed cloud and cybersecurity services
- Advisory, assessment, and compliance support
- Continuous monitoring, optimization, and support

We work closely with stakeholders to align technology initiatives with business objectives while minimizing operational disruption.

Differentiators

- Deep Microsoft-focused expertise across cloud, productivity, and security
- Security-by-design methodology aligned with Zero Trust principles
- Scalable solutions for SMBs, enterprises, and public sector organizations
- Proven delivery frameworks based on Microsoft best practices
- End-to-end lifecycle support: design, deploy, secure, and manage

Core Competencies

Azure Cloud Computing

We design, deploy, and manage secure, high-performance Azure environments tailored to organizational requirements.

- Azure architecture and solution design
- On-premises, hybrid, and cloud-native deployments
- Cloud migration planning and execution
- Azure Virtual Machines, networking, storage, and backup
- Microsoft Entra ID (Azure AD) integration
- High availability, disaster recovery, and business continuity
- Azure monitoring, optimization, and cost management

NAICS, DUNS, CAGE/NCAGE

- NAICS: 541512 / 541519 / 541611 / 541990
- DUNS: 11-772-6234

Microsoft 365 Solutions

We enable secure, efficient modern workplaces through optimized Microsoft 365 deployments.

- Microsoft 365 tenant configuration and governance
- Exchange Online, SharePoint Online, and OneDrive
- Microsoft Teams collaboration enablement
- Endpoint and device management with Microsoft Intune
- Identity, access, and licensing optimization
- Secure remote and hybrid workforce solutions

Cloud Cybersecurity

Security is embedded into every solution we deliver.

- Microsoft Defender (Endpoint, Identity, Cloud Apps, Office 365)
- Identity and Access Management (IAM), MFA, and Conditional Access
- Zero Trust architecture implementation
- Cloud Security Posture Management (CSPM)
- Data Loss Prevention (DLP) and information protection
- Threat detection, logging, incident response, and remediation
- Security assessments, audits, and compliance readiness

IT Training & Consulting

We provide expert advisory and training services to strengthen internal IT capability and decision-making.

- Microsoft Azure and Microsoft 365 technical training
- Cloud security and Zero Trust workshops
- IT staff upskilling and knowledge transfer
- Cloud strategy, roadmap, and governance consulting
- Executive and stakeholder technology briefings

Past Performance / Representative Use Cases

- Migrated legacy infrastructure to Microsoft Azure, improving scalability and resilience
- Implemented Microsoft 365 with secure collaboration and centralized device management
- Deployed Zero Trust security architectures using Microsoft Defender
- Strengthened identity security through MFA and Conditional Access
- Reduced cloud spend through Azure optimization and cost management initiatives

Value to Clients

- Reduced operational risk and improved security posture
- Improved cloud performance and cost efficiency
- Secure remote and hybrid workforce enablement
- Compliance-ready cloud environments
- Reliable long-term cloud and cybersecurity support
